Quick Start Guide	
	<ul> <li>3 week checkout: no renewals</li> </ul>

- Adult MLC (18+) cardholders only
- Pick up and return at RHML only

## WHAT IS A CHROMEBOOK?

- Chromebooks are different from the average laptop; they are designed to work in the "cloud," using apps such as Google Drive, Docs, and Sheets.
- They require an active Internet connection to run, and don't allow software or documents to be saved to the computer itself.
- Our Chromebooks are touchscreen meaning no mouse is provided.

#### Power On

- 1. Make sure the computer is properly charged.
- 2. Open the screen
- 3. The computer automatically turns on when the screen is opened. If it does not turn on automatically, press the Power button.

### **Connect to Internet**

1. Select bar on the lower right corner that shows the time.

2. Select No Network, and then tap the **Wi-Fi** switch to activate. The Wi-Fi list will appear.

3. Select a network from the list of detected Wi-Fi list. 4. If the connection is successfully established, the network icon is displayed.

Log In

1. Login as a guest by clicking "Browse as Guest".

2. When your Chromebook starts for the first time, updates may be performed for up to 5 minutes during the activation step.

## Tablet Mode

### Ports

Our model of Chromebook can be used as a tablet as well! By folding the keyboard, the Chromebook will switch into tablet mode, turn off the keyboard and become fully touchscreen. All the same features are usable in tablet mode.

Adjusting Volume & Brightness

Ð

 $\Diamond$ 

Volume

**Brightness** 

3:38

**RHML Technology Page** https://www.richmondheightslibrary .org/technologytogo/

1. Press the tab on the bottom right of the screen.

Fri, Aug 27 | 93% - 5:05 left

2. A menu will show up. The bottom two bars control the volume and screen brightness. 3. Use the touchscreen or mouse to change the volume or brightness. Left will decrease, and right will increase intensity.
